

5 Reasons you should hire me

1

To increase engagement:

I continually seek opportunities to increase customer satisfaction. I provided training on data management procedures and applications. I was praised by a Director of Clinical Compliance when she stated “Great idea & excellent results”.

2

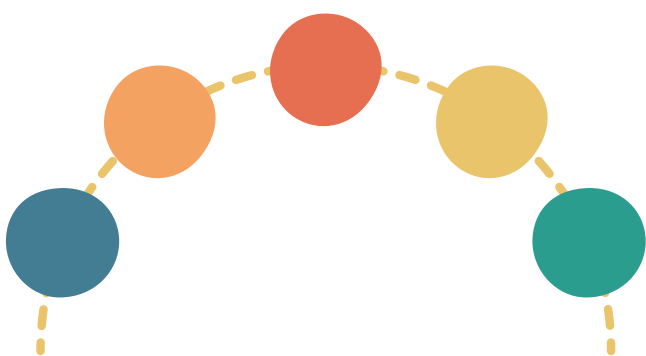

Increase Efficiency:

Under my leadership, the team created an auto-labeling app. that saved the company time and money. This data automation implementation increased efficiency by 90% in one year.

3

Team Efficiency:

During my tenure with a medical device company as a Sr. Manager, I guided the team to enable them for builds in Medidata Rave and effectively utilized each team member to his/her fullest potential.

4

Process Improvement:

I am very proactive and work very hard on bringing efficiencies and new process to the teams I have worked with. I have written DM SOPs including WIs and manuals.

5

Technical Expertise:

I have a great understanding of the technical pieces of Data Mgmt. I am knowledgeable, certified clinical study designer and SAS programmer with a wealth of experience to offer.
